A new footpath in Titinge is shaping up. At present the workers are working on the foam work to be follow soon bae mesh wire and concrete slabbing over the coming days and weeks.

Kobivatu Feraladoa roads

Work on the 295 meters concrete road in Kombivatu to Feraladoa is progressing well. Currently workers are working on the drainage systems etc. Work should complete in the coming weeks.

HEALTH TIPS

HOW CORONA VIRUS SPREAD

The virus that causes COVID-19 is mainly transmitted through droplets generated when an infected person coughs, sneezes, or exhales. These droplets are too heavy to hang in the air, and quickly fall on floors or surfaces. You can be infected by breathing in the virus if you are within close proximity of someone who has COVID-19, or by touching a contaminated surface and then your eyes, nose or mouth.
